MorCare Analytics

Data-driven insights provide you with actionable information to drive impact and improve your facility

MorCare Analytics enables you to review your facility's data to gain insight on large-scale trends, followed by a deep dive with a micro lens to analyze, drilldown and examine patterns, trends, gaps, near misses and department processes and outcomes. Our interactive dashboards and dynamic, custom reporting features deliver powerful metrics that matter to give you the clarity you need with effective decision support at your fingertips. Explore MorCare Analytics with:

- o Care Management – Acute and Outpatient
- o Provider Resource Networking – Coordination of Care Services, Patient Referral → Coming Soon
- o Quality Management
- o Patient Safety & Risk Management

Improve workflows and create efficiencies

Improve quality of care

Decrease costs

Reduce risk and adverse events

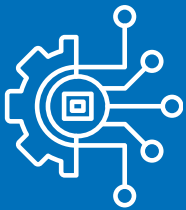

Drill down to improve process and performance

At the click of a button, cut through the complexities and easily engage with interactive dashboards and standard reports, as well as advanced user-friendly ad hoc and custom reports for real-time actionable insights. MorCare Analytics enables leadership, department directors, managers and data analysts to drill down to the patient level of detail. Analyze the effectiveness of your disease management populations while integrating cost, charge and revenue financial information for robust analysis, or track, monitor and evaluate KPIs to benchmark and assess your performance and outcomes.

Your dashboard interface, your way. Save your preferred dashboard and report views for easy, on demand access to your automated analytics.

DASHBOARDS

As reimbursement models shift to value-based contracts that span the continuum of care, healthcare organizations need access to timely and accurate care management and quality outcomes data to make informed operational decisions. The same goes for patient safety and risk management initiatives that require tracking, monitoring, and reviewing patient concerns, incidents, and adverse events. Our dashboards visually transform collected data into actionable insights, highlighting trends and hot-button issues immediately. These insights help data analysts, department managers and other leaders measure and evaluate the performance of their care teams, post-acute partners, and systems with intuitive, customized reporting. Simple charts and graphs allow complex data to be easily understood and shared.

Automated up-to-date analytics

Customized views and build for your facility's needs

Real-time retrieval and review

User-specific views and navigation by role (Executive, Physician, Nurse, etc.)

Easy and quick implementation

EXAMPLES OF STANDARD DASHBOARD DRILLDOWNS

- Quality review volumes
- Quality review types
- Quality review clinical service types
- Top DRG codes
- Average encounter costs
- Peer case review
- Survey Management

Patient Safety & Risk Management

- Safety and incident reporting
- Types of incidents
- Volume of incidents
- Liability claims

Denial

- Denial types, volumes
- Audits, Appeals

DASHBOARD & REPORTING FEATURES

EXPRESSVIEW DESIGNER TOOL FOR CUSTOM AND ADVANCED REPORTS:

MorCare's business intelligence report design tool allows users to explore their data while building, formatting, and exporting reports. There are easy drag and drop settings for beginners, to advanced capabilities for power users to utilize intelligent formulas, customizable visualizations and flexibility for data display, inter-report linking, drilldowns, and more.

STANDARD DASHBOARDS & REPORTS: Off-the-shelf, pre-designed standard dashboard views, as well as the convenience to utilize over 200 templated and standard reports across all our solution dashboards.

CLONED REPORTS: Clone and adjust your standard report settings for targeted results (i.e. filters and data fields).

EXPRESSVIEW DESIGNER TOOL FOR CUSTOM AND ADVANCED DASHBOARDS:

This allows users to easily build and style dashboards by dragging existing reports and visualizations from their library onto the canvas. You can also add and layer additional elements like KPIs, images, text, and interactive filters. We offer an interactive display on the dashboard to help you easily drill into charts, link to related reports, adjust filters, sort data values, change chart types, and refresh data as you go.

AD HOC | CUSTOM REPORTS AND DASHBOARDS: Users have the power to add to and repurpose existing standard or cloned reports, as well as build from scratch using our ExpressView Designer tool.

Empowering collaboration. Optimizing outcomes.

ENTERPRISE SOLUTIONS

About **MorCare LLC**

MorCare is proudly a part of Harris Computer Systems, a leading provider of healthcare software solutions in North America and across the globe. We have been providing extraordinary products for over 30 years.

MorCare's care management solutions help healthcare organizations manage the transition to value-based care while improving patient outcomes, satisfaction, and safety. We do this by providing exceptional care, quality, and patient safety and risk management solutions to the healthcare industry.
